Authentication

Publicado el Sábado, 01 Enero 2011 00:00
Visitas: 4139

The authentication plugins operate when users login to your site or administrator. The Joomla! authentication plugin is in operation by default but you can enable Gmail or LDAP or install a plugin for a different system. An example is included that may be used to create a new authentication plugin.

Default on:

- Joomla Help

Default off:

- Gmail Help
- LDAP Help
